interclean group

MICROFIBRE CLEANING

& FLAT MOPPING SYSTEMS

Launderable Microfibre

FULL RANGE

Traditional cloths and mops remove approx 90% of dirt and germs, with the main issue being that they move dirt and germs around instead of removing them.

TouchPoint Microfibre is proven to trap and remove 99.9% of dirt & germs from surfaces.

ABOUT OUR MICROFIBRE

TouchPoint Ultra-microfibres are 100 times smaller than a human hair and their star structure gives a surface area a 40x greater clean than conventional cotton fibre.

TouchPoint Microfibre contains silver that inhibits bacteria growth, so not only will your surfaces be clean but your cloths will stay cleaner longer.

Our mops have several microfibre cloths inside them which creates a continual absorbing of used cleaning solution allowing surface microfibre to continue cleaning.

Science based testing is used continually to identify the best microfibre, denier, size, moisture level and cleaning technique to deliver the highest level of efficasy and efficiency.

Our Bleach resistant microibre in yellow and white withstands chlorine disinfectants used during cleaning and in the laundering process.

Most TouchPoint microfibre can be launderered 750 times creating the most economical cost in use microfibre availabe when looked after and laundred properly. They can be laundered up to 95 degrees celsius.

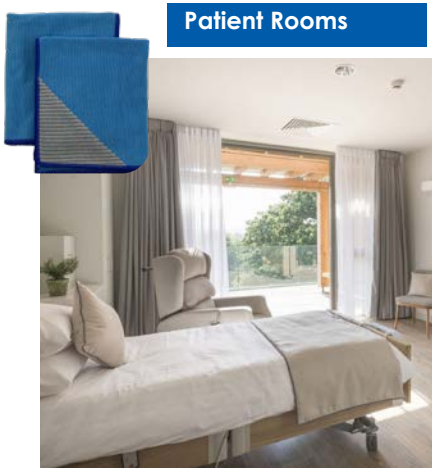
COLOUR CODING YOUR MICROFIBRE

Make sure you're are using the right coloured cloth or mop for the areas you are cleaning. Best practice recommends colour coding cleaning materials and tools to ensure that items are not used in multiple areas, therefore reducing the risk of cross contamination.

Patient Rooms



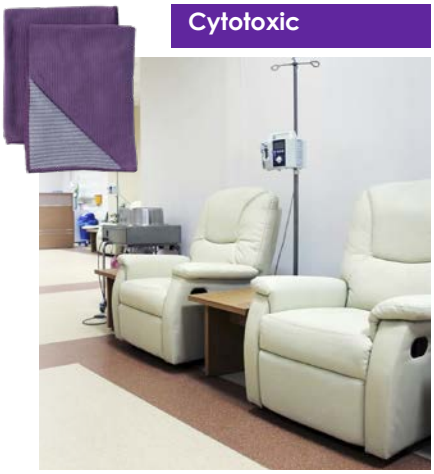
Bathrooms

Kitchen / Dining

Infectious

Theatre

Cytotoxic



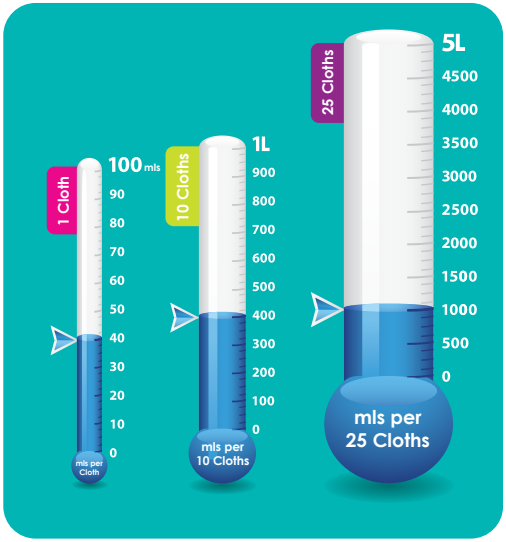
MOISTENING CHART

Cloths need to be moistened correctly to maximise pickup and minimise spreading.

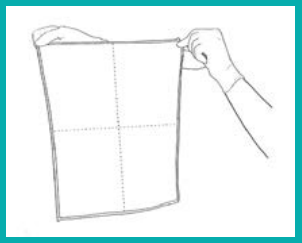
Make sure your cleaners have the right measuring jugs to ensure this.

Healthcare Cloth

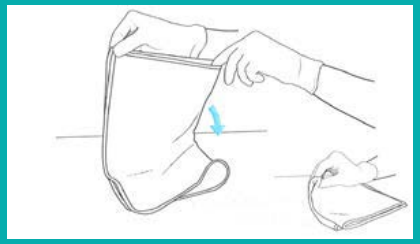
Correct dose	40ml
Moistened weight	90gms
Moisture left on surface	4ml
% of solution picked up	90.00%
Dose for 1 cloth	40ml
Dose for 10 cloths	400ml
Dose for 20 cloths	800mL
Dose for 25 cloths	1L



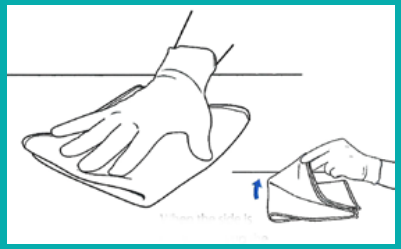
FOLDING YOUR MIRCOFIBRE CLOTHS



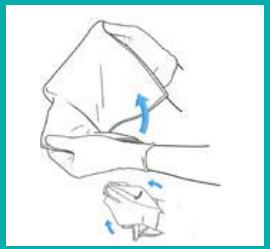
1. Folded correctly each cloth has 8 sides when halved and quarterd.



2. Start by folding the cloth in half. Then halve the cloth once more. The resulting shape should fit your hand.



3. Place an open hand on top of the cloth and start cleaning until the cloth becomes soiled.



4. Fold back to reveal a new clean side and continue use.

HIGH DUSTING

New Ergonomic Handle allows you to adjust angle with the push of a button

Takes launderable Shaggy or Disposable High Dusting Covers

Fits onto Telescopic Poles easily using this adaptor

HOW TO DUST HIGH AND LOW SURFACES

When dusting with launderable or disposable covers, start high and work your way around the room in a consistent direction to minimise missing surfaces. Replace covers when required and launder microfibre at end of shift.

Step 1

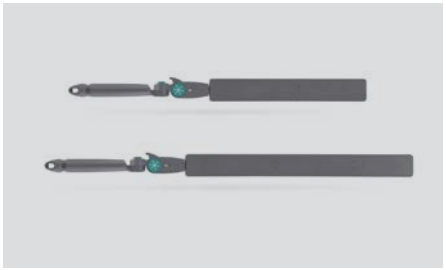
Place cover onto frame.

Step 2

Bend to desired shape.

Step 3

Dust high areas first.



Shaggy High Dusting Tool Frame

Fits onto Telescopic Handles and Reach Extension Poles.

Code	Description
TTS00008878	Dusting Tool Frame 40cm
TTS00008882E	Dusting Tool Frame 60cm

Shaggy High Dusting Tool Covers

Covers are 40cm and come in blue and white.

Code	Description

GLASS & MIRRORS

Easily cleans all horizontal and vertical surfaces within reach

Use a separate pad to clean and maintain stainless steel surfaces in lifts

Can be used to clean any flat shiny surfaces like classroom and boardroom desks

Use on telescopic poles to clean high and large internal glass and mirrors

Also perfect on a 40cm V-Lock base to clean shiny floor surfaces like polished marble

HOW TO CLEAN GLASS, MIRRORS AND SHINY MARBLE FLOORS

The key to cleaning glass and mirrors is to spray a very small amount of water or glass cleaner evenly onto a surface and then wipe it off instantly. By using less solution it will be easier to dry your surfaces without your glass cleaning head becoming too wet.

Step 1

Attach the glass cover by pressing V-Lock strips into backing

Step 2

Spray the surface with a fine mist of pure water.

Step 3

Wipe glass or mirror with glass cover on hand held holder

Hand Held Grabber Frame & Micro Mist Bottle

Tools for use with Glass Cleaning Pads & Microfibre Cloths

TOUCHPOINT SURFACES

MICROFIBRE MOISTENING CHART

Correct Dose	40ml
Moistened weight	90gms
Moisture left on surface	4ml
% of solution picked up	90.00%
Dose for 1 cloth	40ml
Dose for 10 cloths	400ml
Dose for 20 cloths	800mL
Dose for 25 cloths	1L

HOW TO CLEAN TOUCHPOINT SURFACES

TouchPoint surfaces in your facility should be cleaned using high quality microfibre, moistened correctly, using a clean unused area of cloth for each new TouchPoint. Use a Scrubby or the Scrubby corner of the cloth for any hard to remove substances like sticky tape.

Step 1

Take a blue pre-moistened cloth from cleaners trolley and fold twice.

Step 2

Wipe surfaces closest to resident bed first.

Step 3

Unfold to next side and wipe any in room basins.

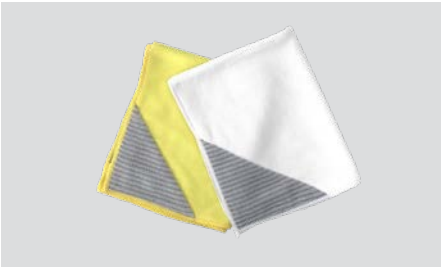
Step 4

Place cloth in bag for later laundering.

Healthcare Cloth with Scrub Corner

If you are cleaning older surfaces where more scrubbing is sometimes required then these new cloths with a 12cm scrub corner will allow you to scrub and clean your surfaces at once.

Code	Description
INTHCSC12B	Microfibre Cloth Blue
INTHCSC12R	Microfibre Cloth Red
INTHCSC12G	Microfibre Cloth Green
INTHCSC12P	Microfibre Cloth Purple



Bleach Resistant Yellow and White Cloths

Bleach resistant microfibre will withstand bleach disinfectant and also bleach in the laundering process. Should last 500 washes when laundered properly.

Code	Description
INTHCSC12Y	Microfibre Cloth Yellow
INTHCSC12W	Microfibre Cloth White

Scrubby

These microfibre scourers are designed to scrub basins, wall tiles, grout. etc and can be laundered the same as your other microfibre cloths and mops.

Code	Description
INTSCRUBBYB	Blue (General)
INTSCRUBBYLR	Red (Washroom)
INTSCRUBBYG	Green (Kitchen)

WALL WASHING
with Bleach Resistant Microfibre

Made up of pleated microfibre that cleans flat surfaces very well

HOW TO CLEAN AND DISINFECT VERTICAL SURFACES

Wall washing is a difficult task as most walls are larger than cleaners can ergonomically reach. For vertical surfaces to be disinfected properly they not only need to be cleaned, they also need to apply a lot of disinfectant solution and have capacity to pick it up again when disinfection is complete.

Step 1

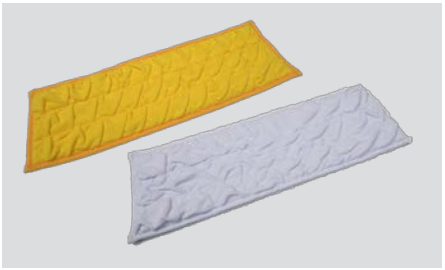
Add cleaning solution to microfibre

Step 2

Clean with microfibre pads

Step 3

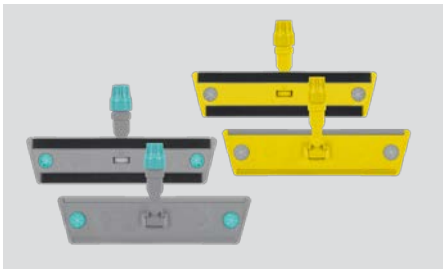
Dispose in laundry bag



40cm Wall-E Wall Washing Covers

Covers can be laundered up to 95 degrees celsius and will last for over 500 washes making it the best way to clean large surfaces.

Code	Description
INTWE40Y	Yellow
INTWE40W	White



40cm Flat Mop Head

40cm Flat Mop Heads will hold your wall washing heads. Use the locks when cleaning ceilings to minimise swivel.

Code	Description

AQUA MOPPING

Aquamop with V-Lock system to hold Scrub n Clean Microfibre Mops`

Aquamop with Trilogy to hold Trilogy double sided Mops

Aquamop with Low Profile V-Lock strips to hold disposable Mops

Cross-contamination, workers compensation costs, WH&S issues, high cost of labour and wastage of chemicals are the main issues facing the cleaning industry today. The old fashioned mop and bucket are at the centre of all of these concerns.

HOW TO MOP FLOORS WITH AN AQUAMOP

The Aquamop is the ultimate mop offering bucket-less mopping. Simply take a new microfibre cover whenever you need it and dispense solution by pressing a button on the handle. This system allows you to clean any small or large areas continuously with the correct moisture level.

Step 1

Fill container with correct solution

Step 2

Insert container into holder

Step 3

Lock it into place by turning bottle to the LEFT.

Step 4

Lift the valve on top of container to open

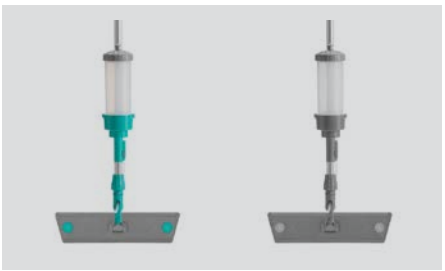
Step 5

Press to release small amount of solution onto the floor ready for mopping

Aquamop 30cm

30cm Aquamops take 30cm microfibre covers are and suitable for cleaning bathrooms and small areas including stairways

Code	Description
ITTS970GY30E	30cm Grey
TTS970GY30R	30cm Red
TTSS030212/19	Replaceable V-Lock Strips (Pair)



Aquamop 40cm

40cm Aquamops take 40cm microfibre covers and can also have Low Profile V-lock strips to hold disposable mops.

Code	Description

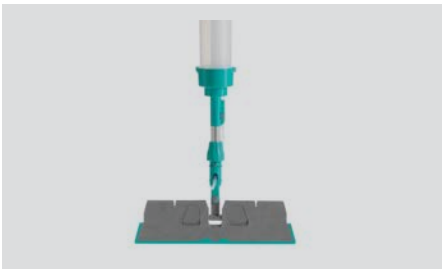
TTS00000970P	Grey/Purple
TTSS030232/33	Replaceable V-Lock Strips (Pair)



Aquamop Trilogy

40cm Trilogy Aquamop allows you to mop floors with a double sided mop head using as much solution as you require

Code	Description
TTS00007300	Trilogy Aquamop Grey

INFINITY MOPPING

Reduces strain, increases productivity

Top grips when unlocked rotates freely, and can be locked when resting against a wall

Central grip also rotates freely allowing 75% reduction in wrist movement

The Infinity joint facilitates the figure 8 movement without tiring shoulders, arms and wrists

Invest into the wellbeing of your staff when choosing the right equipment for your needs. Our mop hardware has been designed using ergonomics to help prevent occupational injuries related to muscle fatigue and stress in the shoulders, arms and wrists.

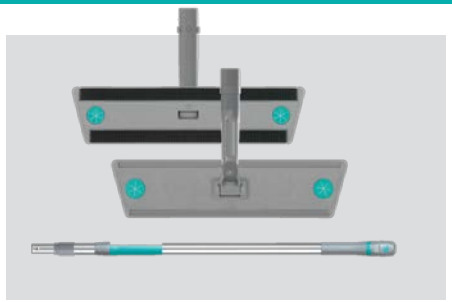
Can be used with launderable microfibre, disposable mops or floor dusting cloths.

USING THE INFINITY MOP

The Infinity mop has been created with both the top and central grips freely rotating allowing the operator to mop floors with 75% less wrist movement. The mop simply follows the operator, always keeping the leading edge forward. Upper grip can be locked to allow mop to rest against walls when not in use.

Traditional mopping increases fatigue and stress on the body

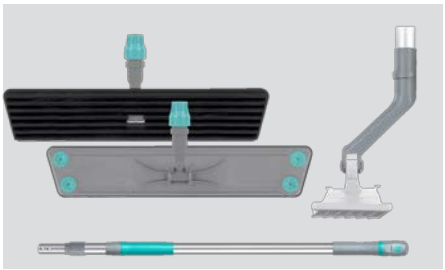
Infinity mopping reduces wrist movement by 75% and reduces cleaner effort



Infinity Handle for V-Lock frames

Ergonomic Infinity handle with V-Lock 40cm frame reduces wrist movement by 75%. Use with Microfibre mop cover from page 23

Code	Description
TTSINFKIT887U	Infinity Kit, inc 40cm frame
TTS0000887U	Infinity V-Lock frame 40cm



Infinity Handle for disposable dustmop 60cm

Ergonomic Infinity handle with 60cm Disposable dustmop frame

Code	Description
TTS00001056	Infinity Handle only
TTS0000961U	Infinity Dustmop Frame 60cm
TTS00000961	Dustmop Frame 60cm

Disposable Dust mop cloths

Roll of 50, 60cm disposable dustmop covers allowing you to dustmop large areas and reduce frequency of mopping.

Code	Description
INT40VI6020	Disposable Dustmop covers 60cm on roll of 50 per roll (6 rolls per ctn)

INFINITY SQUIRT

Can also be used to wash vertical surfaces

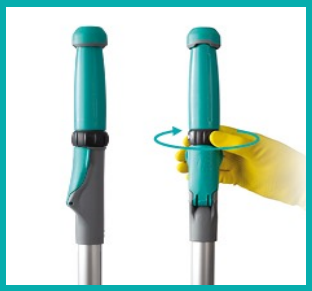
Sprays solution onto floor in front of mop head

Gets under beds and cabinets with ease

USING THE SQUIRT MOP TO SPOT MOP YOUR FLOORS

The Infinity Squirt mop allows users to mop floors in the most efficient and ergonomic way. The handle reservoir holds 500mls of mopping solution and this is dispensed with the push of a button. Use this mop handle with V-Lock microfibre mop heads or with disposable mops.

Fill handle with 500 mls of solution



Close and lock cover

Press top button to release solution

Mop floor in figure 8 motion

Infinity Squirt V-Lock Handle 40cm

Infinity Squirt tank handle with double ergonomic twisting grip holds 500ml of water.

Code	Description
TTS00001170	Infinity tank handle
TTS0000887U	Infinity Velook Frame 40cm

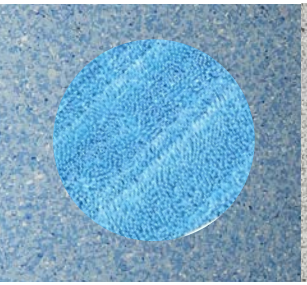
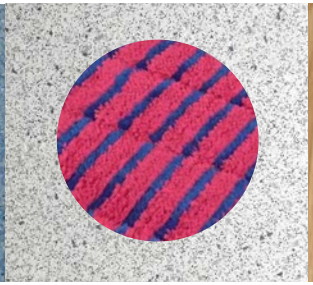
WHICH MOP FOR WHICH SURFACE?



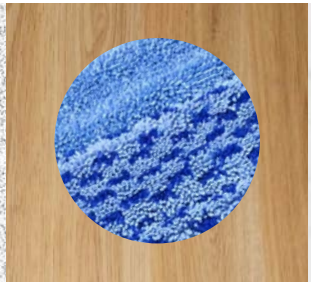
Clean & Dry Microfibre for:

- Low maintenance vinyl
- Sealed vinyl floors
- Smooth tiled floors



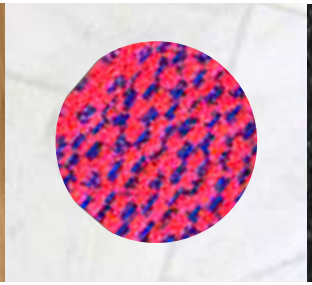
Scrub & Dry Microfibre for:

- Non-slip rated floors with raised abrasives
- Non-slip dimpled floors
- Hard to clean kitchen floors where more solution is required



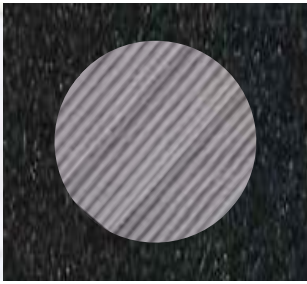
Scrub & Clean Microfibre for:

- Timber looking vinyl where dirt gets trapped in the grain
- Low maintenance & sealed vinyl floors in high traffic areas
- Where extra scrubbing of scruff marks and food is required



Scrub-E Wall & Floor Microfibre for:

- Compact areas like bathrooms where showers, walls & floors can be cleaned with one mop



Mineral Scrub Mop for:

- Mineral stained glass & tiles that require extra scrubbing
- Highly non-slip flooring

HOW TO PRE-MOISTEN YOUR MOP COVERS

Step 1

Prepare your covers by filling your bucket with required mop covers for your cleaning run. Leading edge facing down.

Step 2

Place sieve tray on top of the bucket and pour required amount of solution onto the tray.

Step 3

Remove sieve tray and place lid on bucket securely.

Step 4

Tip up bucket to ensure solution covers all the microfibre covers adequately.

Clean & Dry Mop Cover

Clean & Dry Covers are designed for mopping normal, low maintenance, sealed or tiled floors. They contain two microfibre cloths inside for extra pickup and raised edges for superior glide.

Pre-soaking Dose for 1 mop 200ml

Code	Description
INTCD40VR	40cm Red
INTCD40VB	40cm Blue

Scrub & Dry Mop Cover

These mops are designed to scrub non-slip floors and leave them dry fast. They pick up 600mls of solution while moving over the floor without the cover tearing. Great on hard to clean floors in utility rooms.

Pre-soaking Dose for 1 mop 250ml

Code	Description
